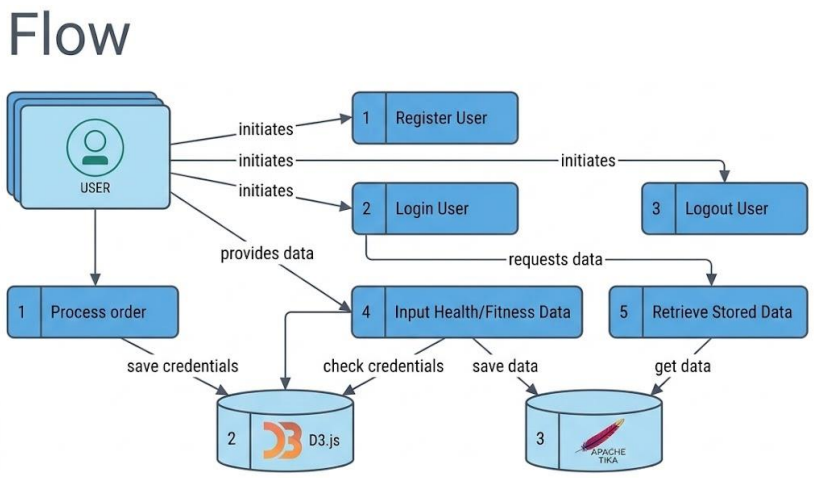
Project Design Phase-II
Data Flow Diagram & User Stories

Date	31 January 2026
Team ID	699d5f80fdf409fdbd1bec27
Project Name	ArogyaMitra – AI-Driven Workout Planning, Nutrition Guidance, and Health Coaching Platform
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example: <u>(Simplified)</u>



1. User interacts with the application, either to register, login, provide fitness data, request data, or logout.
2. Register and Login requests are processed and interact with the User Database to save or check credentials.
3. Input of Health/Fitness data is processed and saved to the Health Data Database.
4. Retrieve data requests are processed and fetch data from the Health Data Database.
5. User logs out, ending the session.

ArogyaMitra is a web-based application where users register, log in, enter health or fitness-related data, and view stored results. The system processes user inputs and stores them in a database.

External Entity:

- User

Processes:

1. Register User
2. Login User
3. Input Health/Fitness Data
4. Retrieve Stored Data
5. Logout User

Data Stores:

- User Database
- Health Data Database

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story No	User Story / Task	Acceptance Criteria	Priority	Release
Customer (Web User)	Registration	USN-1	As a user, I can register by entering my username/email and password.	User account is created and stored in the database.	High	Sprint-1
Customer (Web User)	Login	USN-2	As a user, I can log in using my registered credentials.	User is redirected to the dashboard after successful login.	High	Sprint-1

Customer (Web User)	Data Entry	USN-3	As a user, I can enter my health or fitness-related data into the system.	Entered data is saved in the database.	High	Sprint-1
Customer (Web User)	Data Viewing	USN-4	As a user, I can view my previously stored health or fitness data.	System retrieves and displays saved records.	High	Sprint-1
Customer (Web User)	Logout	USN-5	As a user, I can log out from the application.	Session ends and user returns to login page.	Medium	Sprint-1
Customer (Web User)	Registration	USN-1	As a user, I can register by entering my username/email and password.	User account is created and stored in the database.	High	Sprint-1
Customer (Web User)	Login	USN-2	As a user, I can log in using my registered credentials.	User is redirected to the dashboard after successful login.	High	Sprint-1
Customer (Web User)	Data Entry	USN-3	As a user, I can enter my health or fitness-related data into the system.	Entered data is saved in the database.	High	Sprint-1
Customer (Web User)	Data Viewing	USN-4	As a user, I can view my previously stored health or fitness data.	System retrieves and displays saved records.	High	Sprint-1
Customer (Web User)	Logout	USN-5	As a user, I can log out from the application.	Session ends and user returns to login page.	Medium	Sprint-1
